

Appl. No. 10/024,681
Amdt. dated March 16, 2005
Reply to Office action of December 16, 2004

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) An integrated import/export system comprising:

a database of records relating to a plurality of shipments of goods, where said goods are shipped between at least two jurisdictions, each record having data required to ~~export process exporting of~~ a product from a first jurisdiction and data required to ~~import process importing of~~ a product to a second jurisdiction;

a database server in communication with said database; and

an application server in communication with said database server for providing a user interface to at least one client, each said client associated with a member of a supply chain for a particular one of said plurality of shipments of said goods, said interface allowing each said ~~member at least one client~~ to modify at least a portion of a record relating to said particular one of said plurality of shipments of said goods.

2. (currently amended) The integrated import/export system of claim 1 wherein said application server only allows ~~a particular one of said members~~ said at least one client to modify said at least a portion of said record if said ~~particular one of said members~~ member associated with said at least one client has proper security authorization.

3. (original) The integrated import/export system of claim 1 further comprising an electronic data interchange server in communication with said database server.

4. (currently amended) The integrated import/export system of claim 3 wherein said electronic data interchange server allows said system to exchange information with databases and data repositories of said ~~members~~ member of said supply chain.

5. (original) The integrated import/export system of claim 3 wherein said electronic data interchange server allows access to databases maintained by governments of said

Appl. No. 10/024,681
Amdt. dated March 16, 2005
Reply to Office action of December 16, 2004

jurisdictions.

6. (original) The integrated import/export system of claim 1 further comprising a file transfer protocol server for enabling receipt and transmission of said records using the file transfer protocol.

7. (original) The integrated import/export system of claim 1 further comprising a hyper-text transfer protocol (HTTP) server for enabling receipt of a request for a page and transmission of said page to an origin of said request.

8. (previously amended) A method of operating an integrated import/export system comprising:

maintaining a database of records relating to a plurality of shipments of goods between at least two jurisdictions;

providing an interface for accessing particular ones of said records in said database to a member of a supply chain for said particular ones of said plurality of shipments of said goods;

receiving, from said member, an instruction to modify one of said particular ones of said records relating to said particular one of said plurality of shipments;

determining whether said instruction to modify relates to a portion of said one of said records for which said member has modification authority; and

modifying said one of said records according to said instruction if said member has said modification authority.

9. (original) The method of claim 8 further comprising:

receiving a query for information stored in databases maintained by governments of said at least two jurisdictions;

responsive to receiving said query, accessing said databases maintained by said governments of said at least two jurisdictions to retrieve a result; and

Appl. No. 10/024,681
Amdt. dated March 16, 2005
Reply to Office action of December 16, 2004

presenting said result of said accessing to a source of said query.

10. (original) The method of claim 9 further comprising submitting documentation for entry into said databases maintained by said governments of said at least two jurisdictions.

11. (original) The method of claim 9 further comprising querying said databases maintained by said governments of said at least two jurisdictions to determine a clearance status of a given shipment of said plurality of shipments of said goods.

12. (cancelled)

13. (previously amended) A computer readable medium containing computer-executable instructions which, when performed by a processor in an import/export system, cause the processor to:

maintain a database of records relating to a plurality of shipments of goods between at least two jurisdictions;

provide an interface for accessing particular ones of said records in said database to a member of a supply chain for said particular ones of said plurality of shipments of said goods;

receive, from said member, an instruction to modify a particular one of said records relating to said particular one of said plurality of shipments;

determine whether said instruction to modify relates to a portion of said one of said records for which said member has modification authority; and

modify said one of said records according to said instruction if said member has said modification authority.

14. (previously amended) A record editing system in communication with an integrated import/export system, said record editing system operable to:

display an interface to a member of a supply chain for a particular shipment of goods, said interface allowing interaction with a database of records relating to said shipment of goods maintained at said integrated import/export system, where said goods are

Appl. No. 10/024,681
Amdt. dated March 16, 2005
Reply to Office action of December 16, 2004

shipped between at least two jurisdictions;

receive, from said member, instructions to modify a record relating to said shipment of goods;

determine whether said instructions to modify relate to a portion of said one of said records for which said member has modification authority; and

modify said one of said records according to said instructions if said member has said modification authority.

15. (previously amended) A record editing system in communication with an integrated import/export system, said record editing system comprising:

an output means for displaying an interface to a member of a supply chain for a particular shipment of goods, said interface allowing interaction with a database of records relating to said shipment of goods maintained at said integrated import/export system, where said goods are shipped between at least two jurisdictions;

an input means for receiving, from said member, instructions to modify a record relating to said shipment of goods; and

a processing means adapted to:

determine whether said instructions to modify relate to a portion of said one of said records for which said member has modification authority; and

modify said one of said records according to said instructions if said member has said modification authority.

16. (previously amended) A method of modifying a transaction comprising:

receiving a communication initiation from a party to said transaction;

sending a description of an interface for allowing said party to provide a transaction identifier of said transaction and additional data for said transaction;

Appl. No. 10/024,681
Amdt. dated March 16, 2005
Reply to Office action of December 16, 2004

receiving said transaction identifier of said transaction and said additional data for said transaction;

determining whether said party to said transaction has modification authority; and

modifying an entry in a database identified by said transaction identifier to include said additional data if said party to said transaction is determined to have modification authority.

17. (original) The method of claim 16 where said transaction occurs over a border between a first jurisdiction and a second jurisdiction and said method further comprises:

querying a database maintained by a government of one of said jurisdictions;

receiving a result of said querying; and

based on said result, further modifying said entry, in said database, identified by said transaction identifier.

18. (cancelled)

19. (cancelled)

20. (currently amended) The A method of claim 19 further allowing shipment analysis comprising:

receiving an indication of a proposed shipment from a first jurisdiction to a second jurisdiction;

based on said indication, providing a first metric for said proposed shipment, said first metric derived from data in a database relating to previous shipments from said first jurisdiction to said second jurisdiction;

receiving a suggestion of an intermediate jurisdiction; and

based on said suggestion, providing a second metric for said proposed shipment, said second metric derived from data in a database relating to previous shipments from

Appl. No. 10/024,681
Amdt. dated March 16, 2005
Reply to Office action of December 16, 2004

said first jurisdiction to said intermediate jurisdiction and previous shipments from
said intermediate jurisdiction to said second jurisdiction.

21. (currently amended) ~~The A~~ method of ~~claim 19 further~~ allowing shipment analysis
comprising:

receiving an indication of a proposed shipment from a first jurisdiction to a second
jurisdiction;

based on said indication, providing a first metric for said proposed shipment, said first
metric derived from data in a database relating to previous shipments from said first
jurisdiction to said second jurisdiction;

determining a plurality of alternative metrics for said proposed shipment, each of said
plurality of alternative metrics derived from data in a database relating to previous
shipments from said first jurisdiction to a unique intermediate jurisdiction and
previous shipments from said unique intermediate jurisdiction to said second
jurisdiction;

determining an optimal one of said plurality of alternative metrics; and

providing said optimal one of said plurality of alternative metrics and an indication of
an intermediate jurisdiction corresponding to said optimal one of said plurality of
alternative metrics.

22. (cancelled)
